An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

In claim 8, line 15, after "said fluid streams", - - consistent with increasing the fluid flow rate in at least a portion of the one said zones - - has been inserted.

In claim 13, line 26, after "combinations thereof" - - consistent with increasing the fluid flow rate through at least one of said zones comprising said discrete non-separating section - - has been inserted.

Authorization for this examiner's amendment was given in a telephone interview with David J. Piasecki on November 3, 2004.

The following is an examiner's statement of reasons for allowance: Hotier (U.S. Patent No. 5,582,736) is considered to be the closest prior art because it corrects for dead volume and regulates the flow rate with a recycle pump. The case has been allowed because increasing the flow rate in a first portion of the circuit to compensate for the volume of the non-separating section with changing at least one of the streams would not have been obvious from Hotier (U.S. Patent No. 5,582,736).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
